

PROGRAM ENHANCEMENT

# FUEL MANAGEMENT

## FOR FLEETS THAT NEED TO:

- Help drivers behave more fuel-consciously
- Identify inefficient vehicles that may need maintenance
- Streamline data collection

## DID YOU KNOW?

Driving at 55 mph instead of 65 mph can save up to 68¢ per gallon.

### SOURCE:

[www.fueleconomy.gov](http://www.fueleconomy.gov)

## CLIENT SPOTLIGHT

"With these results at today's fuel prices, we expect to save between \$400 and \$900 per vehicle every year."

– LeFLEUR TRANSPORTATION

## SPOT FUEL WASTE FOR BOTH DRIVERS AND VEHICLES

When it comes to managing one of your most volatile expenses, the right information makes all the difference. Fuel Management distinguishes between the driver and vehicle factors of fuel consumption to help you pinpoint where you can improve fuel economy.

## THE TRUE ADVANTAGE

### Monitor inefficient drivers

- Focus on your most inefficient drivers with the Lytx Fuel Score
- Pinpoint aggressive behaviors that may be causing excessive fuel consumption, and vehicle wear and tear

### Recognize inefficient vehicles

- Track fuel consumption by vehicle when connected to the ECM
- Compare your vehicle's fuel efficiency score to similar benchmark vehicles in the Lytx database

### ECM connection automates data capture

Connect directly to your vehicle's ECM to collect odometer readings and add vehicle data to the Lytx Fuel Score with minimal effort.

SOLUTIONS FOR ANY FLEET

**GPS Technology:**  
Built-in GPS and accelerometer systems combine to determine vehicle MPG.

**ECM Connection:**  
Captures vehicle data most accurately by connecting directly to the ECM.

**COMPATIBLE HARDWARE**  
ER-SV2  
DC3/DC3P\*

*\*ECM connectivity requires installation of compatible cable (installed and sold seperately).*

**MARKET AVAILABILITY**  
United States  
Canada

**CONTACT**
