

PROGRAM ENHANCEMENT

FLEET TRACKING

FOR FLEETS THAT NEED TO:

- Maximize driver productivity
- Protect business assets
- Reduce fuel use and maintenance costs
- Get better visibility into vehicle use

DID YOU KNOW?

A typical heavy-duty engine burns nearly a gallon of fuel per hour when idling.

Fleet Tracking real-time idle status icons for vehicles that have not moved in 10 minutes with the ignition on to help you spot idle vehicles for better fuel economy.

COMPATIBLE HARDWARE

ER-SV2
DC3/DC3P

MARKET AVAILABILITY

United States/Canada

KNOW THE STATUS OF YOUR ENTIRE FLEET

Understanding how your fleet moves is critical to optimizing day-to-day productivity. Fleet Tracking lets you see where your vehicles are at all times to help you monitor driver compliance, spot inefficient behaviors and lower your operating costs.

THE TRUE ADVANTAGE

Improve customer satisfaction

Real-time tracking gives you visibility into every vehicle's location so you can dispatch your closest drivers and more accurately share ETAs with clients.

Monitor vehicles in specific locations

Set up custom geo-fencing boundaries to see when drivers arrive or leave designated areas. Breadcrumb trails give you a visual history of your driver's exact route.

Protect your assets

Monitor vehicle use and adherence to specified routes with alerts during defined time periods or when drivers travel in or out of restricted areas.

Seamless Integration

Information is captured via Global Positioning System (GPS) technology already installed in your Lytx® Event Recorder. No additional in-cab equipment, cables or software is needed.

TRY FLEET TRACKING FREE FOR 90 DAYS

All it takes is a call to your Lytx Client Account Manager to add Fleet Tracking to your DriveCam safety program.

Vehicles requiring complex installation or ECM connectivity may require additional parts and labor (sold separately).
