

CRUM & FORSTER®
A FAIRFAX COMPANY

RISK ENGINEERING

Risk Engineering

Dedicated Partnership Focusing on Your Risk Management Priorities

We understand your business and are at your service.

Crum & Forster's consultative risk engineers partner with our customers to provide a full portfolio of casualty and property loss mitigation services that align with your company's risk management goals and culture. Our Risk Engineers, located throughout the U. S., have the experience, training and professionalism to provide risk management solutions to meet your business needs and contribute to your success. They bring a welcome "can do" attitude, collaborating with you on services ranging from simple training or resource provision requests to customized service plans, benchmarking success with both, short and long term objectives.

Your assigned Risk Engineer contact or multi-location services coordinator becomes an active and contributing member of your team, working closely with your team to understand the business and safety culture in order to contribute in the most effective manner. We are adept at the detailed analysis of loss trends, safety programs, and facility "best practices" to target risk improvement areas and then work with you on innovative program development that achieve results. We've developed an "all lines" portfolio of services that offers something for everyone, delivering services that improve business results by protecting essential human and physical assets. We employ practical, solution-oriented approaches that specifically target your loss sources and protect your brand.
