

Risk Engineering

Dedicated Partnership Focusing on Your Risk Management Priorities

We understand your business and are at your service.

Crum & Forster's consultative Risk Engineers partner with our customers to provide a full portfolio of property and casualty loss mitigation services that align with your company's risk management goals and culture. Our Risk Engineers, located throughout the U.S., have the experience, training and professionalism to provide risk management solutions to meet your business needs and contribute to your success. We bring a welcome "can do" attitude, collaborating with you on services ranging from training or resource provision requests to customized service plans, benchmarking success with both short-and long-term objectives.

Your assigned Risk Engineer contact or multi-location services coordinator becomes an active and contributing member of your team, working closely with you to understand your business and safety culture in order to contribute in the most effective manner.

We are adept at the detailed analysis of loss trends, safety programs, and facility "best practices" to target risk improvement areas and then work with you on innovative program development that achieves results. We've developed a flexible "all lines" portfolio of services and customized resources to provide exactly what you need to protect essential human and physical assets. We employ practical, solutions-oriented approaches that specifically target your loss sources and help you protect your brand and reputation.
