

RISK ENGINEERING TRANSPORTATION

Crum & Forster's Risk Engineering team works with existing and prospective customers in a collaborative manner to help mitigate risk and enhance safety programs. The Risk Engineering team possesses an extensive background in DOT compliance, telematics, fleet safety, driver coaching, and industry best-practices. Our technical experts provide practical recommendations for addressing areas of concern.

Our suite of value-added services, vendor relationships, and referral discounts includes:

- Accident Report Kits
- Client Policy and Guideline Reviews
- Customized Action Plans for Risk Mitigation
- Driver Qualification Solutions
- Driver Scoring Apps
- Integrated Safety Dashboards
- MVR Monitoring Services
- Telematics and Dash Cameras
- Tips to improve FMCSA Scores
- Training Material Resources
- Weigh Station Bypass Apps
